Local and/or State governments should pass non-discrimination ordinances that would provide special protection for those who self-identify as lesbian, gay, bisexual, or transgender.

Human life begins at conception and deserves legal protection at every stage until natural death.

There should be a strict constitutional spending limit for state and local governments that would tie the rate of spending to the rate of population growth plus the rate of inflation.

Free enterprise and the right to private property turn mankind's natural self-interest into the fairest and most productive economic system there is.

Marriage is the union of one man and one woman. No government has the authority to alter this definition.

Free market competition for education dollars, rather than a government monopoly, would create a better education for all students.

Religious freedom is our most foundational freedom and deserves added protection in our state and federal constitutions.

The liberty of parents to direct the upbringing, education, and medical care of their children is a fundamental right.

State Senator, District 30

If you were a Texas House Rep, reasonable gun restrictions would be an important legislative priority to protect public safety.

If you were a Texas House Rep, nondiscriminatory language protecting those who self-identify as lesbian, gay, bisexual, or transgender must be codified.

Human life deserves protection from conception until natural death.

If you were a Texas House Rep, the legislature should support protecting marriage as the union of one man and one woman.

Judeo-Christian values established a framework of morality which permitted our system of limited government.

If you were a Texas House Rep, laws removing displays of the Ten Commandments in public school buildings should be passed.

As a judge I would consider cultural differences in the parties when making my rulings including but not limited to Sharia law.

Our most foundational freedom - Religious Liberty - deserves the utmost protection.
